Solution**

ZenCORE at work for you

A CENTRALIZED ORDER MANAGEMENT AND EXECUTION SYSTEM

Integrate your online & offline stores, third-party marketplace, sales channel such as shopify, amazon, ebay, rista, POS providers and ERP. ZenCore platform efficiently manages all incoming orders from a unified & centralized back-office order management system. Capable of checking inventory and sets re-order to avoid out-of-stock situation.

Once received the order for processing from online B2B, B2C or any Marketplace or offline, the system check the inventory availability from nearest store, warehouse, processing / fulfillment centre prepare for picking, packing, and shipping. ZenCore order management system runs seemingly in a unified single processing mode as order-to-deliver management platform.

customer order management and execution system for your business needs

ADAPTABLE SOLUTIONS

Order execution can become complex and challenging if orders must be sourced from different fulfillment / warehouse / store locations. It can be time consuming and prone to error. With ZenCore, orders are automatically separated depending on the items mentioned, send them to appropriate store or the warehouse for availability before assigning and executing. Following factors are taken into consideration while processing orders across businesses, distribution centers and carriers provides:
• Nature of the product
• Number of items.
• Nature of business
• Shipping packaging.
• Workforce productivity.
• Seasonality.

ZENCORE TECHNOLOGY CENTRIC
